ERGONOMIC WORK STATIONS

Electric height adjustable desks

Significantly decreases the severity of musculoskeletal discomfort for most upper body regions.

501-19 Design with the unique design. Stand-alone or setup i groups, both works excellent.

501-19 Design

The spine is not meant to stay in a seated position for long periods.

Work better – live better

Every day more and more people are enjoying the many benefits of working while standing. Numerous studies show that working from a sitting position for extended periods of time is clearly detrimental to your health. The ConSet line of electric height adjustable desks gives you the power to transform how you work. Standing while working may be the simplest and most effective way to control weight gain, increase productivity and combat fatigue and back pain.

Electric height adjustable desks

Ergonomics and flexibility are keywords when setting up a proper work station. Being able to change working position is a key factor in attaining the perfect work station. ConSet desks are affordable, and many of them are available in several sizes and colors. You can feel the benefit almost immediately when you move from a sitting to a standing position. So stop sitting and stand up for yourself and your health.

501-17 is simplicity and elegance. The simple exterior characterizes the entire product. The table also has a number of practical features like retractable cable tray and built-in wheels.

501-7 Wall is a desk for an absolute low price. The frame does not take much space and is perfect for small table tops.

501-19 Wall gives maximum legroom and is still stylish and modern. A both functional and attractive work station.
